

BIG HOLE DRILLING

Bulroc are now pleased to introduce their new and innovative Big Hole range of DTH hammers, button bits and overburden systems capable of producing cased holes up to 850mm (33.5") diameter for uncased holes up to 1,090mm (43") for all types of rock formations.

This range also has significant potential for the construction and pipeline industries for horizontal drilling applications. Here again, holes up to 1,060mm (41.75") diameter can be produced, whether cased or uncased, depending on the rock conditions.

All the necessary consumable drilling equipment is available from Bulroc details of which can be found in our new big hole drilling brochure. We are sure you will find its contents useful and interesting and would be only too happy to answer any questions or queries that you may have relative to this equipment.

For your next big hole drilling project contact the Bulroc sales team and we'll be only too happy to assist.
